

## MUSEUM SUPPLIERS

Contacts and Resources for Victorian Museums and Galleries

### Introduction

This list aims to assist Victorian galleries and museums of all kinds in sourcing suitable equipment, materials and services. It includes some national as well as state suppliers as some products are highly specialised and only provided by a few businesses. The suppliers included have been sourced from information provided by organisations seeking assistance from the Australian Museums and Galleries Association Victoria (AMaGA Victoria). We are always seeking new options for our members, so please refer to the form on the last page to nominate a supplier your organisation has used and would recommend.

### First Nations Suppliers

First Nations Suppliers providing materials, equipment and services to the museum and gallery sector have been indicated (with \*\*).

### Disclaimer

These listings are presented for information purposes only, and do not represent endorsement by the Australian Museums and Galleries Association Victoria (AMaGA Victoria) its affiliates or employees. Suppliers that have current advertising, sponsorship or other associations with AMaGA Victoria are marked (with \*). No suppliers have paid to be included in this document and it is intended as a tool, not a definitive list of providers.

### Choosing the right materials and equipment for your museum or gallery

Background research can assist museum and gallery personnel to work out what's best and decide on cost effective, sustainable solutions that meet conservation and access needs.

*The National Standards for Australian Museums and Galleries* is a useful starting point for background research. The standards and benchmarks show what to aim for. The tips and resource lists are linked to a wealth of publications and websites that can help you.

You can download *The National Standards for Australian Museums and Galleries* from [https://amagavic.org.au/assets/National\\_Standards\\_1\\_5.pdf](https://amagavic.org.au/assets/National_Standards_1_5.pdf)
